To Whom It May Concern,

I am writing to express my interest in an internship opportunity within your organization. As an incoming fourth-year Information Technology student, I am eager to gain practical experience and apply the knowledge I have acquired in a real-world environment.

I am particularly interested in opportunities related to web development and the use of computer applications. I am motivated, adaptable, and committed to contributing meaningfully to the tasks and goals of any team I join. I believe this internship will help me further develop both my technical and professional skills.

I would greatly appreciate the opportunity to grow and contribute as part of your team. I am available for an interview at your convenience and can be reached via email or phone.

Thank you for your time and consideration.

Sincerely,

Rhim Angelo Sagales

General Academic Strand

Skills & abilities

- **Project Management** - Effectively plans and organizes development tasks, especially in solo or small-team web app projects.
- **Problem Solving** - Skilled at debugging code, structuring databases, and resolving user experience or technical issues in real-world web applications.
- **Communication** - Able to explain technical concepts clearly, write clean and readable code, and present project outcomes or ideas effectively — especially useful in collaborative or internship settings

Projects

Explore [my projects](#) or view [my portfolio](#).

- **Authentikey - Computer Lab Usage Monitoring System**
A web-based application designed to streamline and monitor computer usage within ICCT's computer laboratories. Built with Firebase Realtime Database and Tailwind CSS, Authentikey tracks student log-ins and log-outs, PC assignments, and usage history, providing administrators with real-time data for better resource management and accountability.
- **TeaChat – Real-Time Messaging Web Application**
A web-based chat application developed using Express, Firebase Realtime Database, Socket.IO, and Tailwind CSS. Supports real-time message syncing between users, featuring a simple and charming user interface.
- **ICCT Events – School Event Management Web Application**
A web-based platform developed to organize and display upcoming events at ICCT. Built with MongoDB Atlas and Tailwind CSS, it allows administrators to post event details and students to view announcements through a clean, accessible interface.
- **DTR System – Command-Line Daily Time Record Tool**
A terminal-based employee timekeeping system developed in Python. Features include employee registration, time-in/time-out logging, shift tracking (day/night), absence detection, and summary reports of hours worked and absences over custom date ranges.
